SK260 LC

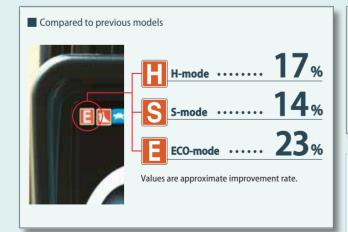

In Pursuit of Improved Fuel Efficiency

Operation Mode

 $Fuel \ consumption \ is \ lower \ in \ H-mode/S-mode/ECO-mode \ in \ comparison \ with \ the \ previous \ model \ (Generation \ 8).$

Always and Forever.

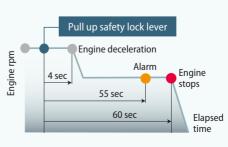

Yesterday, Today, and Tomorrow. Obsessed with Fuel Efficiency.

Over the past 10 years, Kobelco has achieved an average reduction of about 38% in fuel consumption. And we vow to continue to lead in fuel efficiency.

Compared to SK260LC-6 (2006)

...... 38%

AIS (Auto Idle Stop)

If the safety lock lever is lifted up, the engine will stop automatically. This eliminates wasteful idling during standby, saving fuel and reducing CO₂ emissions as well.

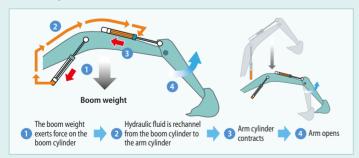

Hydraulic System: Revolutionary Technology Saves Fuel

Arm Interflow System VEW

When lowering the boom, this system uses the downward force generated by the boom's weight to push fluid to the arm. This greatly reduces the need to apply power from outside the system.

Pursuing Maximum Fuel Efficiency

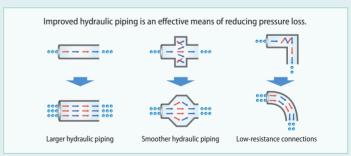

Common Rail System

High-pressure injection atomizes the fuel, and more precise injection improves combustion efficiency. This also contributes to better fuel economy.

Hydraulic Circuit Reduces Energy Loss

We have made every effort to enhance fuel efficiency by minimizing hydraulic pressure resistance, improving the hydraulic line layout to control friction resistance loss and minimizing valve resistance.

Piping for Nibbler & Breaker

Piping for Nibbler & Breaker is fitted as standard.

More Power and Higher Efficiency

The highly efficient hydraulic system minimizes fuel consumption while maximizing power. With nimble movement and superior digging power, this excavator promises to improve your job productivity.

Improved Fuel Efficiency Contributes to High Performance

Superior Digging Performance

Powerful digging force delivers outstanding performance.

Max. Bucket Digging Force

170kN

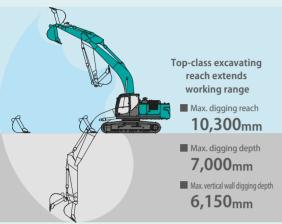

With Power Boost: 187k

Max. Arm Crowding Force

122kN Normal:

Get More Done Faster with Superior Operability

*Values are for Standard HD arm (2.98m) and 1.00m³ bucket

Piping for Quick Hitch (optional)

A quick hitch hydraulic line, which speeds up attachment changes, is available as an option.

A Light Touch on the Lever Means Smoother, Less Tiring Work

It takes 38%* less effort to work the operation lever, which reduces fatigue over long working hours or continued operations.

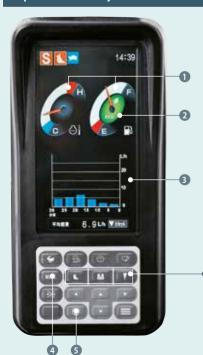

*compared to SK260LC-8

Powerful traveling force and drawbar pulling force deliver plenty of speed when climbing slopes or negotiating bad roads, and the agility to change direction swiftly and smoothly.

■ Drawbar Pulling Force: 244kN

Operator-friendly Features Include Controls that Are Easy to See, Easy to Use

Multi-Display in Color

Brilliant colors and graphic displays are easy to recognize on the LCD multi-display in the console. The display shows fuel consumption, maintenance intervals, and more.

- Analog gauge provides an intuitive reading of fuel level and engine water temperature
- Green indicator light shows low fuel consumption during operation
- 3 Fuel consumption/Switch indicator for rear camera images
- 4 Digging mode switch
- Monitor display switch

Fuel consumption

Maintenanc

Breaker mod

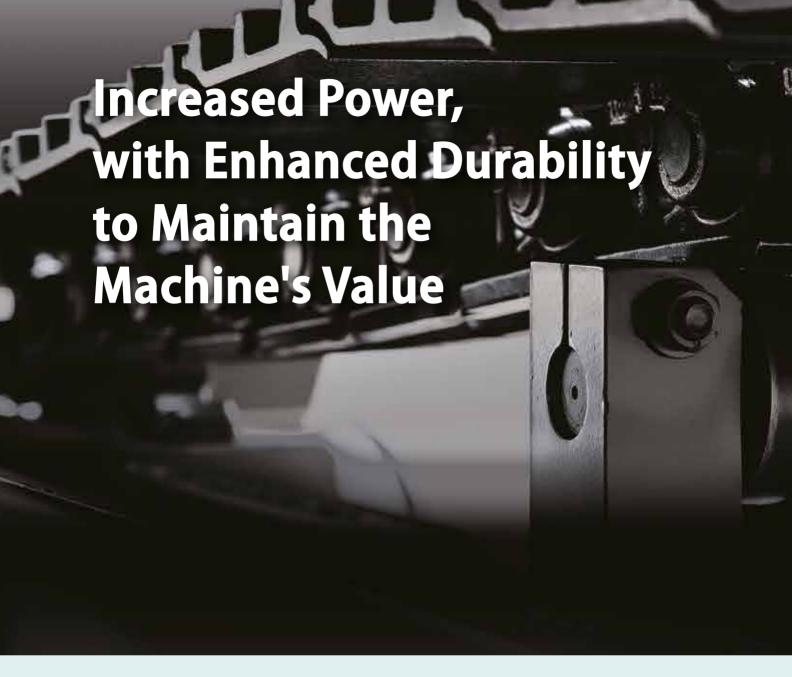

libbler mode

Rearview monitoring (Option)

One-Touch Attachment Mode Switch

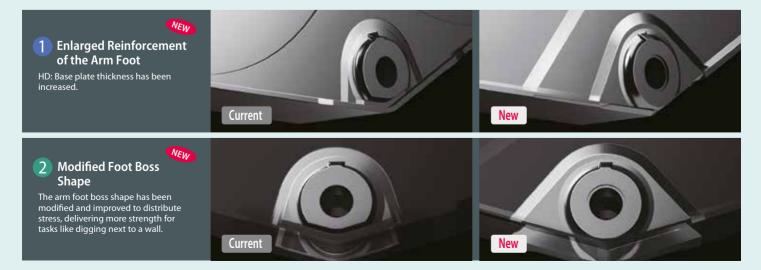

A simple touch of a button, switches the hydraulic circuit and flow amount to match attachment changes. Icons help the operator to confirm the proper configuration at a glance.

Built to Operate in Tough Working Environments

The attachment has been reinforced to handle a higher work volume, with greater power and excellent durability that can withstand demanding work conditions.

7

Improved Filtration System Reliability

Clean, contaminant-free fuel and hydraulic fluid are essential to stable performance. The improved filtration systems reduce the risk of mechanical trouble and enhance longevity and durability.

Hydraulic Fluid Filter **NEW**

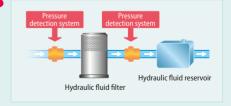

Recognized as the best in the industry, our Premium-fine filter separates out even the smallest particles. New cover prevents contamination when changing filters.

Hydraulic Fluid Filter Clog Detector

Hydraulic tank pressure sensor monitors the pressure difference between the return line and tank inside pressure to determine the degree of clogging. If the difference exceeds a predetermined level, a warning appears on the multi-display, so any contamination can be trapped by the filter and replaced before it reaches the hydraulic fluid in the tank.

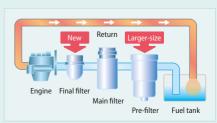

Metal Mesh Cover NEW **Air Cleaner**

Metal mesh cover ensures strength and durability.

Fuel Filter

The pre-filter with built-in water separator has 1.6 times more filter area compared to the previous models and with a new final stage maintenance free fuel filter to maximize filtering performance.

Comfortable Cab Is Now Safer than Ever

Comfort

Super-Airtight Cab

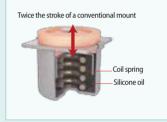

The high level of air-tightness keeps dust out of the cab.

Ouiet Inside

The high level of air-tightness ensures a quiet, comfortable cabin interior.

Low Vibration

Coil springs absorb small vibrations, and high suspension mounts filled with silicone oil reduce heavy vibration. The long stroke achieved by this system provides excellent protection from vibration.

Broad View Liberates the Operator

The front window features one large piece of glass without a center pillar on the right side for a wide, unobstructed view.

Air Conditioner Louvers behind the Seat

The large air-conditioner has louvers on the back pillars that blow from behind and to the right and left of the operator's seat. They can be adjusted to put a direct flow of cool/warm air on the operator, which means a more comfortable operating environment.

More Comfortable Seat Means Higher Productivity

Large Cab Is Easy to Get in and Out of

The expanded cab provides plenty of room for a large door, more headroom and smoother entry and exit.

Interior Equipment Adds to Comfort and Convenience

Safety

ROPS Cab*

ROPS (Roll-Over-Protective Structure)-compliant cab clears ISO standards (ISO-12117-2: 2008) and ensures greater safety for the operator should the machine tip over.

Expanded Field of View for Greater Safety

Greater safety assured by rearview mirrors on left and right.

Rear view shows the area directly behind the cab.

A rear view camera is installed as option to simplify checking for safety behind the machine. The picture appears on the color monitor.

Easy, On-the-Spot Maintenance VEW

There is ample space in the engine compartment for a mechanic to do maintenance work inside. The distance between steps is lower so entry and exit is easier. And the mechanic can work in comfort, without contortions or unnatural body positions. Finally, the hood is lighter and easier to raise and lower.

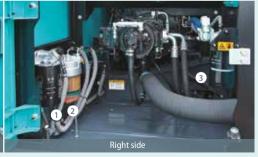

Maintenance Work, Daily Checks, Etc., Can Be Done from Ground Level

The layout allows for easy access from the ground for many daily checks and regular maintenance tasks.

- 1 Fuel filter
- 2 Fuel filter with built-in water-separator
- 3 Engine oil filter

Simple layout for easy access to radiator and cooling system elements.

Efficient Maintenance Keeps the Machine in Peak Operating Condition

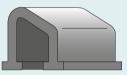

More Efficient Maintenance Inside the Cab

Internal and external air conditioner filters can be easily removed without tools for cleaning.

Easy Cleaning

Special crawler frame design for easy mud removal cleaning

2,000

Long-Interval Maintenance Long-life hydraulic oil reduces cost and labor.

Replacement cycle: 1,000 hours

Highly Durable Premium-fine

The high-capacity hydraulic oil filter incorporates glass fiber with superior cleaning power and durability.

Detachable two-piece floor mat with handles for easy removal. A floor drain is located under floor mat.

Engine oil pan equipped with drain valve.

KOMEXS

KOMEXS is a satellite-based system for receiving machine information. Manage your machines anywhere in the world using the Internet. Location, workload and diagnostic data aid business operations.

Direct Access to Operational Status

Location Data

Accurate location data can be obtained even from sites where communications are

Operating Hours

A comparison of operating times of machines at multiple locations shows which locations are busier and more profitable.

Operating hours on site can be accurately recorded, for running time calculations needed

Fuel Consumption Data

Data on fuel consumption and idling times can be used to indicate improvements in fuel consumption.

The graph shows how working hours are divided among different operating categories, including digging, idling, traveling, and optional operations (N&B).

Maintenance Data and Warning Alerts

Machine Maintenance Data

Provides maintenance status of separate machines operating at multiple sites.

Maintenance data is also relayed to KOBELCO service personnel, for more efficient planning of periodic

Security System

Fngine Start Alarm

Sends a notification if the engine is started outside of

Sends a notification if the machine leaves a pre-defined

Note: KOMEXS is not applicable in some area due to country regulation of the communication lines or availability of infrastructure.

Engine

Model	HINO J05E-TH	
Туре	Direct injection, water-cooled, 4-cycle diesel engine with turbocharger, intercooler	
No. of cylinders	4	
Bore and stroke	112 mm x 130 mm	
Displacement	5.123 L	
Datad navvar autnut	137 kW/2,100 min ⁻¹ (without fan ISO 14396)	
Rated power output	132 kW/2,100 min ⁻¹ (with fan)	
Max. torque	654 N•m/1,600 min ⁻¹ (without fan ISO 14396)	
	644 N•m/1,600 min ⁻¹ (with fan)	

Hydraulic System

Pump	
Туре	Two variable displacement axial piston pumps + one gear pump
Max. discharge flow	2 x 245 L/min, 1 x 21 L/min
Relief valve setting	
Boom, arm and bucket	34.3 MPa {350 kgf/cm ² }
Power Boost	37.8 MPa {385 kgf/cm²}
Travel circuit	34.3 MPa {350 kgf/cm ² }
Swing circuit	28.4 MPa {290 kgf/cm ² }
Control circuit	5.0 MPa {50 kgf/cm ² }
Pilot control pump	Gear type
Main control valve	8-spool
Oil cooler	Air cooled type

Swing System

Swing motor	Axial piston motor
Brake	Hydraulic; locking automatically when the swing control lever is in neutral position
Parking brake	Wet multiple plate
Swing speed	10.8 min ⁻¹ {rpm}
Tail swing radius	3,100 mm
Min. front swing radius	3,910 mm

Travel System

Travel motors	Variable displacement piston motors
Travel brakes	Hydraulic
Parking brakes	Wet multiple plate
Travel shoes	51 each side
Travel speed	6.1/3.8 km/h
Drawbar pulling force	244 kN (ISO 7464)
Gradeability	70 % {35°}
Ground clearance	460 mm

Cab & Control

Cab

All-weather, sound-suppressed steel cab mounted on the high suspension mounts filled with silicone oil and equipped with a heavy, insulated floor mat.

Control

Two hand levers and two foot pedals for travel
Two hand levers for excavating and swing
Electric rotary-type engine throttle

Boom, Arm & Bucket

Boom cylinders	135 mm x 1,235 mm	
Arm cylinder	145 mm x 1,635 mm	
Bucket cylinder	125 mm x 1,200 mm	

Refilling Capacities & Lubrications

Fuel tank	403 L	
Cooling system	21 L	
Engine oil	20.5 L	
Travel reduction gear	2 x 4.5 L	
Swing reduction gear	5 L	
Under ulie oil tools	165 L tank oil level	
Hydraulic oil tank	331 L hydraulic system

Notes

- 1. Do not attempt to lift or hold any load that is greater than these lift capacities at their specified lift point radius and heights. Weight of all accessories must be deducted from the above lift capacities
- 2. Lift capacities are based on machine standing on level, firm, and uniform ground. User must make allowance for job conditions such as soft or uneven ground, out of level conditions, side loads, sudden stopping of loads, hazardous conditions, experience of personnel, etc.
- 3. Arm top pin is defined as lift point.
- 4. The above lift capacities are in compliance with ISO 10567. They do not exceed 87% of hydraulic lift
- capacity or 75% of tipping load. Lift capacities marked with an asterisk (*) are limited by hydraulic capacity rather than tipping load.
- 5. Operator should be fully acquainted with the Operator's and Maintenance I operating this machine. Rules for safe operation of equipment should be ac

STANDARD EQUIPMENT

- HINO J05E-TH diesel engine with turbocharger and intercooler
- Automatic engine deceleration
- Auto Idle Stop (AIS)
- Batteries (2 x 12V 96Ah)
- Starting motor (24V 5 kW), 50 amp alternator
- Automatic engine shut-down
- Engine oil pan drain cock
- Double element air cleaner CONTROL
- Working mode selector (H-mode, S-mode and ECO-mode)
- Power Boost

SWING SYSTEM & TRAVEL SYSTEM

- Swing rebound prevention system
- Straight propel system
- Two-speed travel with automatic shift down
- Sealed & lubricated track links
- Grease-type track adjusters
- Automatic swing brake
- **HYDRAULIC** ■ Standard piping (Less N & B piping)
- Arm regeneration system ■ Auto warm up system
- Aluminum hydraulic oil cooler
- Arm interflow system ■ Hydraulic fluid filter clog detector **MIRRORS & LIGHTS**
- Two rear view mirrors
- Two boom lights
- One storage box light

CAB & CONTROL

- Two control levers.
- pilot-operated
- Horn, electric
- Cab light (interior)
- Luggage tray
- Large cup holder
- Detachable two-piece floor mat
- Headrest
- Handrails
- Intermittent windshield wiper with double-spray washer
- Skylight
- Tinted safety glass
- Pull-up type front window and removable lower front window
- Easy-to-read multi-display color monitor
- Automatic air conditioner
- Emergency escape hammer

OPTIONAL EQUIPMENT
